Contents

OpenRideServer-ejb

This project contains the logic for the algorithm. The algorithm uses a file that must be named: "routingGraph.hh" (for more information see Installation-Guide). Nothing more has to be changed at these components.

OpenRideServer-RS

This project contains the view of the application and the service-endpoints. The services do not have to be changed, but the view has to be adapted to the customers' wishes.

Src

Nothing to change here.

Web

CSS

- The mobile client's layout may be adjusted by editing the main CSS file: "web/view/css/style.css"
- The login page's and usage terms' layout may be adjusted by editing the CSS file: "web/welcome_ style.css"

Images

- Any images that might need to be replaced reside in the "web/img" directory.
- Shortcut icon (favicon): "img/icon.png"
- Logo: "img/logo_zu.png"

HTML

- The logo displayed on the login page is included in "WEB-INF/jspf/welcome_login.jsp" as well as the "imprint", "terms" and "404/500" JSPs.
- Text of "web/imprint.jsp" and "web/terms.jsp" needs to be adjusted

OpenRideWeb

This project contains the view and logic needed for the registration process and the desktop client version of OpenRide.

Nothing to change here.

Web

CSS

- The overall layout may be adjusted by editing the main CSS file: "web/css/default.css"

Images

- Any images that might need to be replaced reside in the "web/img" directory.

- Main logo: "img/heading.png"

HTML
- Text of "web/imprint.jsp", "web/terms.jsp" , "web/faq.jsp" , "web/about.jsp" , "web/contact.jsp" and "web/partners.jsp" needs to be adjusted
- To add/remove navigation items, edit "WEB-INF/jspf/header.jsp" AND "WEB-INF/jspf/header_static.jsp" (for error pages)
- Copyright text needs to be adjusted in "WEB-INF/jspf/footer.jsp"
- Support email address may be adjusted in "WEB-INF/jspf/welcome_login.jsp"
- Partner logos may be adjusted in "WEB-INF/jspf/welcome_partners.jsp"
-

OpenRideAdmin

This project contains the view and logic needed for the administration tool of OpenRide.
